

ROSETTE CLAMP

PART #	DESCRIPTION	WEIGHT (LBS.)
RC	Rosette Clamp	2.5

Third-party manufactured component. Data may vary.

The rosette clamp can be installed between existing rosettes to create a connection point for horizontals or trusses.

Clamp bolts should have between 40 and 65 lbs. tension. Overtightening could damage the threads, bolt or item the clamp is attached to.

All material must be inspected prior to use! See inspection guidelines on page 87.
